Give your pantry a makeover and say goodbye to wire shelves!

If you ask most homeowners how they feel about builder-grade wire shelving in their pantry, you'll probably hear the same answer: "I can't wait to get rid of it!"

Wire shelving may be inexpensive, but it's not ideal for pantry storage. Cans, jars, boxes and containers can tip, slide or even fall through the gaps. It can be difficult to move items along the wire, and the shelves often aren't designed to handle the weight of a fully stocked pantry. Many homeowners resort to lining their wire shelves with cardboard, plywood or plastic just to create a more usable surface.

A custom pantry from Victory Closets can transform that frustrating space into one that is beautiful, organized and designed around the way your family lives.

Our designers evaluate your pantry's size and layout, listen to your storage needs and create a custom design that maximizes every inch of available space. Adjustable shelving provides the versatility you need for everything from canned goods and spices to small appliances and serving dishes.

For walk-in pantries, our one-piece seamless rounded corner shelves make use of otherwise difficult-to-access corner space. They're perfect for small appliances, serving pieces, Lazy Susans, rotating spice racks and other items you want within easy reach.

You can further customize your pantry with glide-out baskets, soft-close dovetailed wood drawers and dedicated storage for produce, snacks and grab-and-go items. We can even design around refrigerators, freezers and wine fridges or create a dedicated coffee station or appliance counter.

If you have 9-foot or taller ceilings, our extended-height pantry system adds 14 inches of additional upper-shelf storage.

Ready to make your pantry more organized, functional, and beautiful? Contact Victory Closets today at 484-363-2272 and start planning your dream pantry transformation!
